

MATERIAL SAFETY DATA SHEET (MSDS)

FOODFRESH (GRADE 5,7,9,101)

DATE: MARCH 2019

Version 1

Page 1 of 2

Ref. No.: FOODFRESH 5, 7, 9, 101

1 PRODUCT AND COMPANY IDENTIFICATION

Product Name FOODFRESH PACKAGING GAS
Chemical Formula CO₂ + N₂
Trade Names Foodfresh 5
 Foodfresh 7
 Foodfresh 9
 Foodfresh 101
Colour coding Ivory body with a sticker showing relevant grades
Valve Brass ¾ inch BSP right hand female.
Company Identification Les Gaz Industriels Ltd
 Pailles Road
 G.R.N.W. Republic of Mauritius
 Tel No: (+230) 212-8306
 Fax No: (+230) 212-0235

EMERGENCY NUMBER (+230) 800 1133

2 COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Names	Carbon dioxide	Nitrogen
	<u>Carbon Dioxide</u>	<u>Nitrogen</u>
Cas Nos.	124-38-9	7727-37-9
UN Nos.	1013	1066
	<u>Carbon Dioxide /Nitrogen Mixtures</u>	
UN Nos.	1956	
ERG No	121	
Hazchem Warning	2 C Non-flammable gas	

3 HAZARDS IDENTIFICATION

Main Hazards

All cylinders are portable gas containers, and must be regarded as pressure vessels at all times. The listed grades of FoodFresh do not support life. They can act as simple asphyxiants by diluting the concentration of oxygen in air below the levels necessary to support life. Foodfresh are all heavier than air, and will tend to concentrate at lower levels.

Adverse Health Effects

The carbon dioxide component, contained in the relevant grades of FoodFresh, acts as a stimulant and a depressant on the central nervous system. Increases in heart rate and blood pressure have been noted at a concentration of 7.6 percent, and dyspnea (laboured breathing), headache, dizziness and sweating occur if exposure at that level is prolonged.

Chemical Hazards

Both the carbon dioxide and nitrogen components of the listed grades of FoodFresh are relatively non-reactive and non-toxic. They will not burn or support combustion.

Biological Hazards

The greatest physiological effect of carbon dioxide is to stimulate the respiratory centre, thereby controlling the volume and rate of respiration.

Vapour Inhalation

At concentrations of 10 % and above of carbon dioxide, unconsciousness can result in one minute or less. Impairment in performance has been noted during prolonged exposure to concentrations of 3 percent carbon dioxide even when the oxygen concentration was 21 percent.

Eye/Skin Contact No known effect.
Ingestion (See "Vapour Inhalation" above)

4 FIRST AID MEASURES

Prompt medical attention is mandatory in all cases of overexposure to FoodFresh. Rescue personnel should be equipped with self-contained breathing apparatus. For the listed grades of FoodFresh that contain carbon dioxide, concentrations of 10 percent or more can produce unconsciousness or death. Lower concentrations may cause headache, sweating, rapid breathing, increased heartbeat, shortness of breath, dizziness, mental depression, visual disturbances and shaking. Conscious persons should be assisted to an uncontaminated area and inhale fresh air.

Quick removal from the contaminated area is most important. Unconscious persons should be removed to an uncontaminated area and given mouth-to-mouth resuscitation and supplemental oxygen.
 Eye contact No known effect
 Skin contact No known effect
 Ingestion (See section 3 above)

5 FIRE FIGHTING MEASURES

Extinguishing Media

The listed range of FoodFresh mixtures do not support combustion, but could act as extinguishing media.

Specific Hazards

The range of FoodFresh mixtures do not support life. They can act as simple asphyxiants by diluting the concentration of oxygen in the air below the levels to support life

Emergency Actions

If possible, shut off the source of excess FoodFresh. Evacuate area. All cylinders should be removed from the vicinity of the fire. Cylinders that cannot be removed should be cooled with water from a safe distance. Cylinders which have been exposed to excessive heat should be clearly identified and returned to supplier.

CONTACT SUPPLIER.

Protective Clothing

Self-contained breathing apparatus. Safety gloves and shoes, or boots, should be worn when handling cylinders.

Environmental Precautions

The listed mixtures are heavier than air, and could accumulate in low-lying areas. Care should be taken when entering a potentially oxygen-deficient environment. If possible, ventilate the affected area.

6 ACCIDENTAL RELEASE MEASURES

Personal Precautions

Do not enter any area where FoodFresh has been spilled unless tests have shown that it is safe to do so.

Environmental Precautions

FoodFresh does not pose a hazard to the environment..

Small Spills

Shut off the source of escaping gas mixture. Ventilate the area.

Large Spills

Evacuate the area. Shut off the source of the spill if this can be done without risk. Restrict access to the area until completion of the clean-up procedure. Ventilate the area using forced-draught if necessary.

7 HANDLING AND STORAGE

Do not allow cylinders to slide or come into contact with sharp edges. The listed grades of FoodFresh may be stacked horizontally provided that they are firmly secured at each end to prevent rolling. Use a "first in - first out" inventory system to prevent full cylinders from being stored for excessive periods of time. Keep out of reach of children.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Hazards

As FoodFresh mixtures are simple asphyxiants, avoid any areas where spillage has taken place. Only enter once testing has proved the atmosphere to be safe

Engineering Control Measures

Engineering control measures are preferred to reduce exposure to oxygen depleted atmospheres. General methods include forced-draught ventilation, separate from other exhaust ventilation systems. Ensure that sufficient fresh air enters at, or near, floor level.

Personal Protection

Self-contained breathing apparatus should always be worn when entering area where oxygen depletion may have occurred. Safety goggles, gloves and shoes, or boots, should be worn when handling cylinders.

Skin No known effect.

MATERIAL SAFETY DATA SHEET (MSDS) FOODFRESH (GRADE 5,7,9,101)

DATE: MARCH 2019

Version 1

Ref. No.: FOODFRESH 5, 7, 9, 101

9 PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL DATA

Carbon Dioxide

Chemical Symbol	CO2
Molecular Weight	44,01
Specific volume @ 20°C & 101,325 kPa	547 ml/g
Relative density of gas @ 101,325 kPa (Air = 1)	1,53
Colour	None
Taste	Acidic
Odour	None

Nitrogen

Chemical Symbol	N2
Molecular Weight	28,013
Specific volume @ 20°C & 101,325 kPa	861,5 ml/g
Relative density of gas @ 101,325 kPa (Air = 1)	0,967
Colour	None
Taste	None
Odour	None

10 STABILITY AND REACTIVITY

Conditions to avoid

The dilution of oxygen in the atmosphere to levels which cannot support life. Never use cylinders as rollers or supports, or for any other purpose than the storing of FoodFresh. Never expose cylinders to excessive heat, as this may cause sufficient build-up of pressure to rupture the cylinders.

Incompatible Materials

As dry FoodFresh mixtures are inert they may be contained in systems constructed of any of the common metals which have been designed to safely withstand the pressures involved.

Hazardous Decomposition Products

None

11 TOXICOLOGICAL INFORMATION

Acute Toxicity	TLV 5000 vpm (for CO2)
Skin & eye contact	No known effect
Chronic Toxicity	No known effect
Carcinogenicity	No known effect
Mutagenicity	No known effect
Reproductive Hazards	No known effect

(For further information see Section 3. Adverse Health effects)

12 ECOLOGICAL INFORMATION

The listed mixtures are heavier than air, but all can cause pockets of oxygen-depleted atmosphere in low-lying areas. They do not pose a hazard to the ecology.

13 DISPOSAL CONSIDERATIONS

Disposal Methods

Small amounts may be blown to the atmosphere under controlled conditions. Large amounts should only be handled by the gas supplier.

Disposal of Packaging

The disposal of cylinders must only be handled by the gas supplier.

14 TRANSPORT INFORMATION

ROAD TRANSPORTATION

UN No	1956
ERG No	121
Hazchem warning	2C Non-flammable Gas

SEA TRANSPORTATION

IMDG	1956
Class	2.2
Packaging group	
label	Non-flammable gas

AIR TRANSPORTATION

ICAO/IATA Code	1956
Class	2.2
Packaging group	
Packaging instructions	
- Cargo	200
- Passenger	200
Maximum quantity allowed	
- Cargo	150kg
- Passenger	75kg

15 REGULATORY INFORMATION

EEC Hazard class	Non-flammable
Reference standard SANS 10234	
Refer to SABS 0265 for explanation of the above.
